WORK OBJECTIVES

With 3 years of experience building secure, high-concurrency apps using **Flutter** and **Native Android**. I combine strong foundations in **Clean Architecture and BLoC** with **AI-augmented workflows** to accelerate production, moving beyond basic "vibe coding."

WORK EXPERIENCE

Flutter Software Engineer, *Sadara Investments* 02/2024 – Present
Cairo, Egypt

- **Full-Lifecycle Development:** Architected and delivered iOS/Android apps leveraging **AI-assisted workflows** (Cursor, Agents) to accelerate delivery while strictly maintaining **Clean Architecture** and **99.9% crash-free stability**.

Flutter Instructor, *Techno Space* 12/2019 – 10/2021
Cairo, Egypt

- Mentored developers in **Flutter, BLoC, and Firebase**. Led a student team to secure **1st place** in a prestigious programming competition.

Android Developer, *Freelancer (Native Development)* 01/2018 – 05/2020

- Designed and deployed **native Android applications (Java/XML)** to the Play Store, optimizing **memory management** and building backends with **PHP/SQL**.

PROJECTS

Family Park app, *(Booking App for 70-Acre Park)*
(Google play) **(App Store)**
Developed a high-performance, cross-platform booking app (iOS/Android) for a 70-acre entertainment park.

- **Architected** the app using **Clean Architecture** and **MVVM** for a scalable and maintainable codebase.
- **Engineered** responsive UI and stateful logic using **Cubit (Bloc)** for state management.
- **Implemented** complex booking APIs using **Dio** and integrated **Firebase (Crashlytics, Notifications)** & **SMS Misr** to ensure stability (99.9% crash-free) and engagement.

Safi Mart app, *(Scalable Full-Featured E-commerce Platform)*
(Google play) **(App Store)**
Developed a full-featured, cross-platform e-commerce app (iOS/Android) for Safi, enabling users to browse, purchase, and pay securely.

- **Engineered** the core shopping experience, including a secure **cart system** and **payment gateway integration**.
- **Managed** all complex app states efficiently using **Flutter Bloc**, ensuring a responsive, maintainable, and high-performance UI.
- **Structured** data handling by integrating backend APIs via **Dio** (for network) and implementing **Hive** for fast, persistent local storage (e.g., user's cart).
- **Integrated Firebase** services for **Authentication** (securing user data) and **Push Notifications** (for order updates and engagement).

Banzinty App, *(Official app for Sadara)*
(Google play)

- Architected the app using **Flutter Bloc** & **GetIt**, engineered the "Scan & Pay" feature (with **PayTabs** & **QR Scanner**), and developed a "Station Locator" with **Google Maps SDK**. Also integrated **Firebase (Auth/FCM)**, **Dio**, and **Hive** for local caching.

TECHNICAL SKILLS

Mobile & Languages: Flutter SDK, Dart, Native Android (Java, XML), PHP, SQL.

Architecture & State: Clean Architecture, MVVM, BLoC/Cubit, SOLID, OOP.

Networking & DB: RESTful APIs, Dio, PayTabs, Hive, SQFLITE.

Tools: Firebase (Crashlytics, FCM, Auth), Git, GitHub, Agile, **GetIt**.

EDUCATION QUALIFICATIONS

Postgraduate Diploma (Pre-Master's) in Software Engineering (AI & Business Intelligence), *Faculty of Computer and Information Sciences, Ain Shams University*
10/2025 – Present
Cairo, Egypt

Bachelor of Computer Engineering,
Faculty of Engineering and Technology, Modern Academy
09/2015 – 07/2020
Cairo, Egypt

LANGUAGE SKILLS

Arabic: Native, **English:** Fluent, **French:** Basic
