Mahmoud Elmaghraby

Mobile Software Engineer

mahmoudelmaghraby515@gmail.com | +201156521009 | Cairo, Egypt | linkedin | GitHub

WORK OBJECTIVES

Mobile Software Engineer with **4+ years** of experience in cross-platform and native mobile app development. Specializing in architecting secure, high-performance Flutter applications for **SaaS products, ERP systems, POS solutions, and E-commerce platforms.** Adept at implementing responsive UI components, integrating RESTful APIs, and utilizing robust state management (**BLoC, GetX, Provider, Riverpod). Strong team collaborator utilizing** Git and CI/CD to deliver scalable features and maintain system stability.

WORK EXPERIENCE

Flutter Software Engineer, *SIT (Al-Masdar for Information Technology)* 08/2026 – Present
Cairo, Egypt

- Spearheading the architecture and development of cross-platform mobile applications for complex **SaaS ERP platforms, POS solutions, and E-commerce** systems.
- Implementing responsive **UI components, styling, and animations**, while contributing to feature development and fixing bugs to ensure optimal performance.
- Driving digital transformation by enforcing Clean Architecture and seamlessly integrating complex **RESTful APIs** and backend services.

Flutter Software Engineer, *Sadara Investments* 02/2024 – 07/2026
Cairo, Egypt

• **Architected and delivered secure** iOS/Android applications using Clean Architecture and BLoC, achieving a 99.9% crash-free stability rate.
• **Developed custom platform-specific features** using Native Android (Kotlin/Java) and streamlined app store releases via CI/CD pipelines.

Technical Instructor (Contract), *IGS & Partners @ CIC* 04/2026 – 04/2026
Cairo, Egypt

• Instructed the "Applied Flutter UI Development" bootcamp for CIC engineering students.
• Earned an **86.67/100 Facilitator NPS**, recognized for clear delivery and practical industry examples.

Software Engineer, *Egyptian armed forces* 11/2021 – 10/2023
Cairo, Egypt

- Assigned to highly secure, **confidential software projects** for the Ministry of Defense.
- Maintained system integrity and handled sensitive operations within a strictly closed, high-security environment.

Flutter Instructor, *Techno Space* 12/2019 – 10/2021
Cairo, Egypt

- Mentored developers in **Flutter, BLoC, and Firebase**. Led a student team to secure **1st place** in a prestigious programming competition.

Android Developer, *Freelancer (Native Development)* 01/2018 – 05/2020

- Designed and deployed **native Android applications (Java/XML)** to the Play Store, optimizing **memory management** and building backends with **PHP/SQL**.

PROJECTS

Family Park app, *(Booking App for 70-Acre Park)*
(Google play) (App Store)
Developed a high-performance, cross-platform booking app (iOS/Android) for a 70-acre entertainment park.

- **Architected** the app using **Clean Architecture** and **MVVM** for a scalable and maintainable codebase.
- Engineered responsive UI and stateful logic using Cubit (BLoC) for state management, incorporating **Pagination, Search functionality, and RTL support**.
- **Implemented** complex booking APIs using **Dio** and integrated **Firebase (Crashlytics, Notifications)** & **SMS Misr** to ensure stability (99.9% crash-free) and engagement.

Safi Mart app, *(Scalable Full-Featured E-commerce Platform)*
(Google play) (App Store)
Developed a full-featured, cross-platform e-commerce app (iOS/Android) for Safi, enabling users to browse, purchase, and pay securely.

- Engineered the core shopping experience and **order management features**, including a secure cart system and payment gateway integration.
- **Integrated REST** APIs via Dio and implemented Hive for secure **offline/caching** capabilities.
- **Integrated Firebase services** for Authentication (securing user data) and **FCM** for Push Notifications.
- Implemented **Branch.io** for complex **Deep linking** strategies and targeted user engagement.

Banzinty App, *(Official app for Sadara)*
(Google play)

- Architected the app using Flutter Bloc & Dependency Injection (GetIt), engineered secure **payment gateway integration** for "Scan & Pay", and developed a "Station Locator" with **Google Maps API**.
- Implemented **realtime features** and live data synchronization using **WebSockets** (Socket.io / SignalR).
- **Built platform channels using Native Android** to handle specific device hardware interactions.

TECHNICAL SKILLS

Mobile & Languages
Flutter SDK, Dart, Native Android (Kotlin, Java, XML), Swift (Familiar), PHP, SQL.

Networking & Real-Time
RESTful APIs, WebSockets (Socket.io, SignalR), Hive (Offline / Caching).

Architecture & Security
Clean Architecture, BLoC/Cubit, GetX, Riverpod, Provider, Mobile Security, Code Reviews, Performance Optimization.
Responsive UI Implementation, Custom Animations, Styling, Figma to UI.

Tools & Deployment
CI/CD Pipelines, App Store & Google Play Deployment, Google Maps API, Firebase, Git.

EDUCATION QUALIFICATIONS

Postgraduate Diploma (Pre-Master's) in Software Engineering (AI & Business Intelligence), *Faculty of Computer and Information Sciences, Ain Shams University*
10/2025 – Present
Cairo, Egypt

Bachelor of Computer Engineering,
Faculty of Engineering and Technology, Modern Academy
09/2015 – 07/2020
Cairo, Egypt

LANGUAGE SKILLS

Arabic: Native, **English:** Fluent, **French:** Basic
